MMR_0717 Robert Price Mid-Eastern Director / Business Manager

Bob Price becomes MMR #717

21 November 2022

Bob Price recently achieved his AP Award for Master Builder - Motive Power. With this Bob has become a Master Model Railroader in the NMRA Achievement Program. Congratulations to Bob on this award and acknowledgement of his model railroading skills and his contributions to the Division, the MER and the NMRA!

Bob Price had a layout that was multi-deck and features]d a large helix. The layout was set in the Pacific Northwest during the time of the Burlington Northern in the 1970s and 1980s and was powered by Digitrax DCC. The layout was built for operations and featured a dispatchers desk, CTC board and camera view of hidden staging. Bob moved in 2014 and plans a bigger and better BN layout that will be open during our Haddon Twp. Division Meets in January, once he gets construction going.
